

E) How to upgrade - [top](#)

- First of all, make a backup of your whole site.
- the upgrade is manual via ftp. First download the latest version to your PC
- Unzip the download file, and find "Upload_Application" folder, just go inside
- Remove the next files inside "Upload_Application" folder
 - (Upload_Application)/index.php
 - (Upload_Application)/application/config/database.php
 - (Upload_Application)/install
- upload them and replace to your hosting

📁 application	11/02/2016 06:03 ...	Carpeta de archivos	
📁 assets	11/02/2016 06:03 ...	Carpeta de archivos	
📁 backups	05/02/2016 02:34 a...	Carpeta de archivos	
📁 filemanager	11/02/2016 06:03 ...	Carpeta de archivos	
📁 libs	11/02/2016 06:03 ...	Carpeta de archivos	
📁 system	11/02/2016 06:03 ...	Carpeta de archivos	
📁 uploads	11/02/2016 06:03 ...	Carpeta de archivos	
📁 user_guide	11/02/2016 06:03 ...	Carpeta de archivos	
📄 change_log.txt	10/02/2016 06:05 ...	Documento de tex...	1 KB
📄 license.txt	10/02/2016 06:05 ...	Documento de tex...	3 KB

- then you will have the latest version.
